ABOUT US

ABOUT US

CCO has concentrated on developing and producing top quality and healthy nail gel products since 2004.

CCO is the first factory to introduce and implement "purifying" and "plant preservation extraction" technologies in the development and production process, thus pioneering these practices within the nail industry. In addition, CCO is an advocate for the concept of "natural, healthy and skin-friendly" UV gels.

PRODUCT LINE

CCO has a rigorous Supply chain management system and insists high quality requirements to the base materials been used in our manufacturing and our entire production processes. All our established suppliers have signed long term contracts with us including regular inspections and controls with respect to method of planting, soil toxicity and climate controls, etc, thus ensuring CCO only works with top quality and zero pollution raw materials.

CCO uses the sycamore tree resin adhesive grown in France as the preferred base material as it has been proven as the most pure, environmentally friendly and sustainable through rigorous testing and comparison of various base raw materials.

75 STANDARD PRODUCTION BASE PRODUCTION PROCESS

CCO has introduced and implemented 76 processes that confirm to [GMPC] international cosmetics production standards and has set up more than 10 Quality Control and Quality Assurance tests covering product development, product samples, testing incoming materials, testing colour strength and longevity, colloids, filling procedures and batch testing of the end product.

At each stage of the development process, product and process reviews are conducted according to these standards to ensure conformity and quality of the product for the end user.

ENTERPRISE QUALIFICATION

OEM/ODM Raw Material

CCO
NAIL GEL

ENRICHING COLORS,BLOOMING THE CHARM OF NAIL ARTS

Expansion of CCO brand concept, Aiming at the characteristics of the skin of the female,

Finally , CCO modulates and researches its own " exclusive colors series" .

According to the creative concept of the whole series as inspiration to select the name ranges,

For each series to create its own name , for products to give the unique soul,

There is simple and joker fashion, and a sweet and dreamlike romance;

There is dignified and elegant classical allusion, and bold and progressive identity;

Meeting the various needs of different nationalities, different colors and different ages of females' nail.
